CARRER OBJECTIVE

To begin my career as a Software Engineer where I can apply my skills in Java, HTML, CSS, SQL, and Cloud Computing to build meaningful and efficient applications. I am passionate about cloud technologies and eager to expand my knowledge in this field while contributing to real-world projects. I aim to continuously learn, enhance my technical expertise, and grow both professionally and personally.

<u>Education</u>	<u>Qualification</u>
Bachelor of Engineering (ELECTRONICS & COMMUNICATION ENGINEERING)	2021 - 2025
Vel Tech High Tech Dr.Rangarajan Dr.Sakunthala Engineering College	CGPA 7.5/10
HSC	2020 - 2021
Sethu Bhaskara Matriculation Higher Secondary School	Percentage – 80.8%
SSLC	2018 - 2019
Sethu Bhaskara Matriculation Higher Secondary School	Percentage – 85.00%

SKILLS

- **Programming Languages:** JAVA, Python(fundamentals), HTML, CSS, JAVA SCRIPT
- **Tools & Technologies:** SQL, CLOUD COMPUTING, MATLAB
- **Soft skills:** Resilience, Receptive, Communication, Team Management

PROJECTS

1. **Project Title: Deep Learning-Powered Mobile System for Real-Time Lung Disease Diagnosis from Chest X-Rays.**

- Built a mobile-based application to detect COVID-19, Pneumonia, Tuberculosis, and Normal cases from chest X-rays.
- Implemented CNN model in TensorFlow Lite and integrated with Flutter for real-time predictions
- Added features: patient detail collection, action recommendations, and automated PDF report generation.

Tools used: Flutter, TensorFlow Lite, Android Studio, GitHub Code spaces.

Language used: Dart (Flutter), Python (for Model Training), Java

2. Project Title: PATIENT PULSE RATE AND OXYGEN LEVEL MONITORING SYSTEM USING IOT

- In this project the device measures the patients pulse rate, Oxygen level and temperature using respective sensors and connected wi-fi module passes the data via messages to patients and clinicians.
- Addressed misclassification issues caused by visual similarities between diseases, reducing errors in diagnosis support.

Tools used: Microcontroller IDE, Internet of Things, Cloud.

Language used: Python

INTERNSHIPS

1. NSIC – Industrial Based Embedded Systems with AI and IoT (DEC 2023 – JAN 2024)
Working on embedded solutions for smart monitoring and predictive maintenance. Developed skills in embedded programming, sensor integration, and IoT frameworks for industrial applications.
2. Cloud computing (AWS & Devops - 2024)
Gained hands-on experience with AWS services (EC2, S3, IAM, VPC) and DevOps tools. Worked on basic CI/CD pipelines using Git and Jenkins, automation with AWS CLI, and cloud deployment practices. Improved understanding of cloud operations, version control, and infrastructure management.

AREA OF INTEREST

- Full Stack Development
- Backend Development (Java)
- Frontend Development (HTML, CSS, JavaScript)
- Database Management & SQL
- CLOUD computing
- API Development

COURSES & CERTIFICATION

- Java Full Stack
